INTRODUCTION

CANSIM* is Statistics Canada's computerized data bank and information retrieval service. It provides detailed and timely statistical information to economists, sociologists, statisticians, planners, analysts and academics in both the private and public sectors.

The CANSIM Mini Base is a subset of approximately 25,000 time series of the CANSIM Time Series or Main Base. The CANSIM Mini Base Series Directory provides a description of all the series available on the CANSIM Mini Base.

The CANSIM Mini Base is accessible via terminal from Secondary Distributors** and is updated on all working days excluding federal government holidays. The CANSIM Mini Base contains a dummy series, Databank Identification Number A100, which users may employ to determine the timeliness of the base. This series contains three datapoints:

- (1) the year, month and day (YYMMDD) of creation of the previous daily update file.
- (2) the year, month and day (YYMMDD) of creation of the current daily update file, and
- (3) the time the update file was loaded on the System of the Secondary distributor.

For all series on the CANSIM Mini Base, the updates will be available within one working day of their release on the CANSIM Main Base. Secondary distributors disseminate CANSIM data according to Statistics Canada guidelines and offer users a choice of software, telecommunication networks and technical support services.

Mini Base users should note that Statistics Canada also produces a CANSIM Main Base Series Directory. This directory, which must be ordered directly from CANSIM Division, provides a description of the more than 425,000 series available on the CANSIM Main Base. Secondary Distributors may obtain series from the CANSIM Main Base in addition to those of the Mini Base. Such series are referred to as Mini Base supplementary series. Users are encouraged to discuss obtaining supplementary series with their Secondary Distributors.

Recent CANSIM initiatives utilizing advanced technologies, make it possible to access CANSIM using microcomputers. Users are also able to employ TELIDON technology to instantly display time series data in graphic form (TELICHART). As well, selected information is being disseminated by CANSIM via electronic messaging services.

The CANSIM central facility is comprised of three databases and access systems and may be accessed from anywhere in Canada by terminal. Business and economic statistics are available in time series format on the Time Series or Main Base (TS). Social statistics and some economic and census data are available in cross-classified format showing multiple and varied relationships over time on the Cross-Classified Base (XCL). Census Summary Data for a variety of geographic breakouts are available on the CANSIM Summary Data System (CSDS).

The CANSIM Division and the Regional Offices of Statistics Canada provide a variety of information, retrieval, and over the counter services on a cost-recovery basis. Please consult your local directory or the service operator at 1-800-555-1212 for the toll-free number of your nearest Regional Office.

HOW TO USE THE CANSIM MINI BASE SERIES DIRECTORY

The contents of the CANSIM Mini Base are grouped by subject into 13 Sections (see Table of Contents for list of sections). Each section provides a summary of the Matrices which pertain to a particular subject (i.e. Population, Prices, Construction, etc.). A "matrix" in CANSIM is equivalent to a "table" in a publication; a "matrix" contains a group of related time series. Following the 13 sections, the Matrix Numbers are listed in ascending numerical order.

Let us take an example:

You are looking for the Operating Statistics of Canadian Railways, monthly. The Table of Contents will indicate that Transportation is Section 10. In Section 10 you find that the series you are looking for is Matrix 142. Now turn to the list of Matrix numbers to locate Matrix 142 and also refer to the Guide to Effective Use of the CANSIM Mini Base Series Directory (page iv). The first series in Matrix 142 is "Railway Revenues" to the right of the series title we have 46-01-00 - this indicates that the data is available starting January, 1946. The Databank Identification Number for the series appears to the right of "PU"; this number is used to retrieve the data. "STC T&C" is the agency and section responsible for this Matrix; should you have any questions concerning concepts, methods, limitations, etc., of this series, please refer to the Inquiries List (Appendix B) for the name and telephone number of a person to contact.
